

DH113

- External battery unit connection feature.
- Ability to define user and master cards.
- Hidden design. No visible panel or keyhole.
- Simply swipe your RFID card to unlock the lock.
- Fast unlocking with a reading distance of up to 50mm.
- Easy vertical and horizontal installation.
- Alert notification when the cabinet door is forced.
- Low power consumption, 4 AA batteries last for 1 year.
- Low battery alarm and automatic opening

ADVANTAGES

- Prevention of key loss,
- Prevention of locked cabinet,
- Prevention of labor time lost during opening of locked cabinet,
- Prevention of costs during the process (repair and replacement of lock),
- Most importantly, prevention of security breaches and the resulting loss of prestige,
- All of these advantages help to quickly recoup the cost of the electronic lock system.

ELECTRONIC CIRCUIT (PCB) Features

C13

Master Card

YES

Number of Users

13

Low Battery Alert

YES

Usage Period

100.000

Transient Current (unlock)

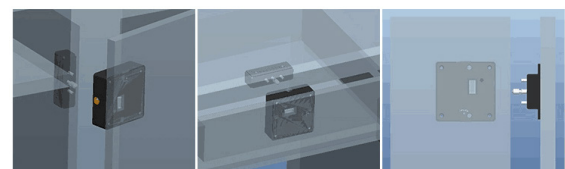

≤ 300 mA

Working Humidity

30% RH ~85% RH

Working Temperature

-10°C ~60°C

Dikey

Yatay
