

# RFID C05PC

- Stainless Steel Surface.
- Operates with 4 alkaline batteries.
- Ability to connect an adapter.
- Can define a password between 1-10 digits.
- Can define up to 10 user cards.
- Easy user password definition.
- Ability to use master password and master card.
- Easy assembly and installation.
- Alert when cabinet door is forced.

## ADVANTAGES

- Prevention of key loss,
- Prevention of locked cabinet,
- Prevention of labor time lost during opening of locked cabinet,
- Prevention of costs during the process (repair and replacement of lock),
- Most importantly, prevention of security breaches and the resulting loss of prestige,
- All of these advantages help to quickly recoup the cost of the electronic lock system.

## ELECTRONIC CIRCUIT (PCB) Features

## RFID C05PC

Master Code	Available
Digits Number	10
User Card	10
Low Battery Alert	Available
Usage Period	100.000
Transient Current (unlock)	≤250mA
Working Humidity	%5~%95RH
Working Temperature	-25 C / 65 C
