Misafir Self-Servis Modu

- **Power supply**

  3 standard AA alkaline batteries.

- **Battery life**

  About one year in normal state.

- **Function card**

  - Mother Card

  - Master Card

  - Temporary Guest Card

1. Definition

- **Mother Card**

  Mother card is set by the cabinet lock. It's used to create or terminate the waiter card and guest card.

- **Master Card**

  Master card is created by mother card, does as a key card to unlock the lock.

- **Temporary Guest Card**

  Create the temporary guest card when the lock is in the unlock state.

2. Reset

This cabinet lock default in guest self-help mode, the option switch is in the right side(next to the reset button).

- **Sıfırlama İşlemi:**

  Please follow the operation to reset: Turn off power, keep pressing the reset button. Turn on the power, buzzer of the lock sounds "beep…beep…beep…" for short. Release the reset button when you hear the "beep" for 5 times, then the lock is reset.

- **Tips: pls must release the reset button when you hear the "beep" for 5 times. Otherwise, the cabinet lock will enter other working mode.**

- **Explanation**

  Remove the option switch to the left side (far way the reset button), then reset the lock. 1pcs guest key card can lock and unlock 2 cabinet locks at the same time. Otherwise, 1 pcs guest key card can lock and unlock only 1 cabinet locks.

3. Create Mother Card (This operation is necessary)

Connect the power line to the IC, press the "Reset Button" at the back, after a "beep", touch the RF Card which you want to become Mother Card lightly to the hole of lock, after a long "beep" and a short "beep", the RF card is recognized as Mother Card by the lock. Each lock can have one Mother Card at the most; the last one replaces the prior one.

- **Operation**：

Press Reset Button + New Mother Card (1 time)

- **Note: One lock can be set only 1 mother card and this operation is necessary.**

4. Create Master Card

Touch the Mother Card lightly to the lock, after a "beep" and the LED flashes in blue, the lock is unlocked, touch the Mother Card lightly to the lock again, buzzer "beep" for a long sound and blue light flashing, touch the RF card which you want to become master card, create master card successfully with a short "beep". You can continue to touch the other RF Cards before the LED stops flashing. After 6 seconds you touch the last card, the LED stops flashing and finish creating master cards.

- **Operation :**

Mother Card (2 times) + New Master Card (1 time)

- **Note:**

Each lock can create 15 master cards at the most. When you creating master card, buzzer sound 4 times "beep" for short means the number of master card is full already.
